

Personal City

The Building in the City, The City in the Palm of your Hand.

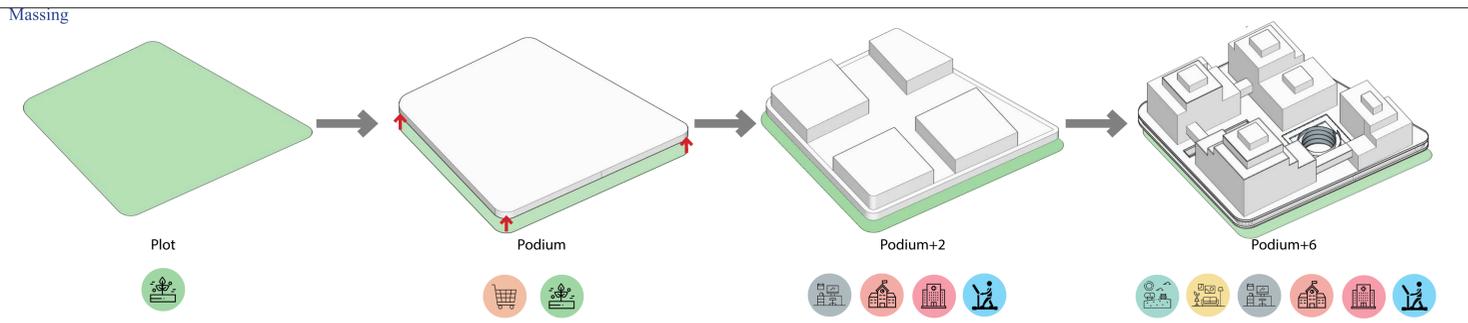

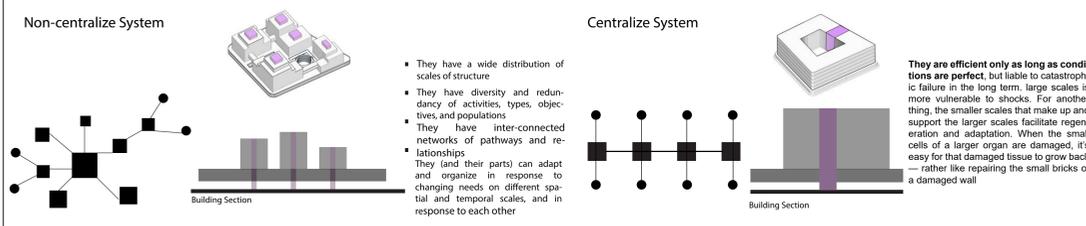

While the world noticed how COVID-19 has a huge impact on everything on human life in all aspects ... architecture couldn't respond fast and adapt with the new reality pandemic showed how the architecture lacks the flexibility and adaptability to face the shocks. This project adopted two ideas for the design the first idea is the 15 min city concept where everything you need is available within your reach in the neighborhood. We can achieve this through non-centralized concept which is a part of the resilience principle it support diversity and redundancy of the project activities, objects and population. Resilient cities evolve in a very specific manner. They retain and build upon older patterns or information. With a rich and balanced diversity of scales, especially including and encouraging the most fine-grained scales, is going to be more easily repairable and adaptable to new uses. It can withstand disruptions better because its responses can occur on any and all different levels of scale. The city uses the disruption to define a "pivot" on a particular scale, around which to structure a complex multi-scale. This dynamic concept vibrates and alive can bring to a smaller scale architecture / buildings a new ways to survive ... bring diversity in facilities, functions and spaces to the project will make a benefit to social community around it and bring city life style living to it (the city in palm of your hand).

Pre COVID : London is live work city

Post Covid -19: All the uses within one place solution

- Open public spaces
- Residential
- Health care
- sport activity (gym)
- Offices cubes
- Retail
- learn

Public is Private PIP

Book Facility for Private use :

- Gym
- Office Cubical
- Electric car or scooter
- Open Space for Family occasions

Book for Activity

(To manage the density):

- Amphitheater for outdoor cinema
- The open space for temporary retail
- Urban Agriculture activity
- Specify the period and the price

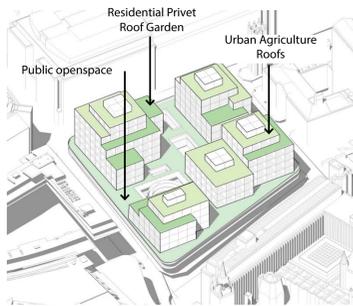

Seasonal Events :

Notify the residence and the public for the upcoming events and festivals

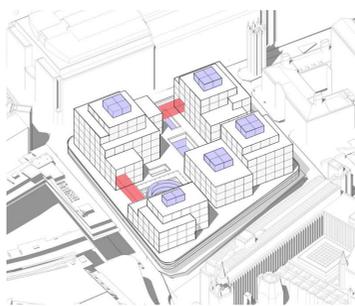

Contributes to community:

This link will help the people with low income to get benefits or discount offers in the building. **Example for the community contribution :**

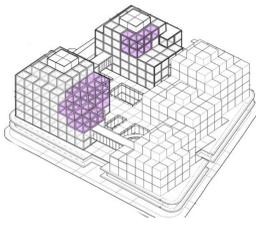

- To be part of the urban Agriculture program
- Volunteer in organizing Events

Outdoor public spaces and roof gardens. Green roofs improve the storm water collection and support the healthy social interaction

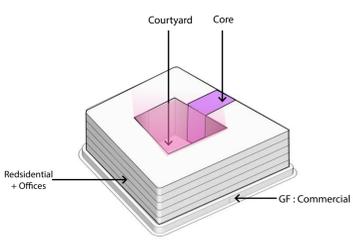

Horizontal and vertical connection

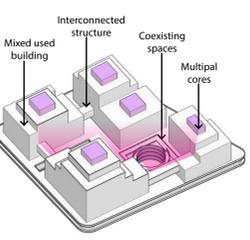

Units mix modularity (flexibility and adaptability)

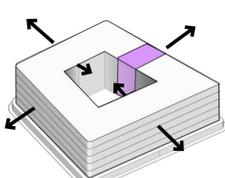

Steel structure cube module. Future expansion flexibility. Residential unit has the flexibility to expand from studio to 3 bedroom flat

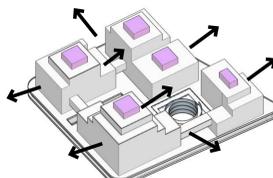

(Normal) Development

Personal City Development

Normal Development

Noncentralized Development
